Why did we choose Hangzhou?

G20 2016 CHINA

Hangzhou's grand events: G20 adds color.

19th Asian Games
Hangzhou 2022

Hangzhou's vitality:
Asian Games inspires.

Hi! I'm Deepseek

City of AI: Unlimited
creation and enjoyment.

Hangzhou's universities:
the glory of the city.

<Introduction>

Centennial History

· Qiushi Academy, founded in 1897, laid a profound historical foundation for Zhejiang University(ZJU).

Campus Size

· Seven major campuses, including the Zijingang Campus, together constitute a large-scale campus.

University Features

· Leading the way are the Project 985, Project 211 and Double First-Class universities.

Important Rankings

· It ranked 3rd in the Best Chinese Universities Ranking 2024 and 8th in the QS Asia University Ranking 2025.

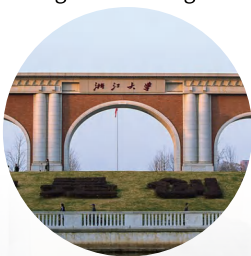

GAR

GAR 2025 International Open Contest and Study Tour

August 15- 19, 2025 | Hangzhou

The Global Artificial Intelligence Robot Contest (GAR), founded and organized by the Global Artificial Intelligence Robot Society (GARS), is a platform for teenagers globally to showcase AI and robotics innovations. In August 2025, we invite you to the GAR 2025 China International Open in Hangzhou.

This competition uniquely combines study tour elements. At Zhejiang University's Yuquan Campus, you can explore the robotics lab and attend interesting tech classes. At the Huzhou Institute of Zhejiang University, you can visit the exhibition hall and operate advanced equipment. Children from different countries can exchange ideas, improving your cognitive and language skills. The tour also includes Hangzhou and Huzhou's natural and cultural sites, enabling all - round growth.

· Zhejiang University

· Global Artificial Intelligence Robot Contest

· West Lake Scenic Area

University visit: Academic trip to ZJU

Step into Zhejiang University, soak up its world-class academic atmosphere, and deeply understand its cutting-edge educational ideas. Interact with teachers and students, acquire knowledge, and experience diverse cultures. During the whole stay, you'll eat, live, and move around on campus, fully blending into Zhejiang University life and starting an unforgettable academic exploration.

○ Eat at ZJU

- Experience the campus cafeteria
- Diverse choices of dishes

○ Live at ZJU

- Hotel jointly named with ZJU
- Sleep soundly in an academic atmosphere.

○ Travel at ZJU

- Stroll around ZJU and enjoy the scenery.
- The small path is accompanied by lakes and mountains.

○ Study at ZJU

- Renowned teachers offer cutting edge courses.
- The laboratory has excellent equipment.

Huzhou Institute: Wisdom drives a new journey

Enter Zhejiang University's Huzhou Institute to deeply explore knowledge and innovation. Tour modern research zones, observe top teams' brainstorming, discover cutting-edge tech creations, and experience the allure of industry - academia - research integration.

Professor sharing: Frontier knowledge and wisdom

Professors with profound knowledge explain key points simply yet profoundly and share new research. In modern research spaces, students can feel the professors' intellectual charisma, explore how cutting - edge theories are born, and see how research and practice blend.

International exchange: Gain friendship and confidence

Children from around the world gather to discuss tech and robot topics. In the back - and - forth of ideas, they explore cutting - edge knowledge, boost cognitive skills, and enhance language expression in an all - English setting.

Urban exploration: Explore nature and landmarks

Here, the natural scenery and urban landmarks interweave to form a vivid picture. Children will personally experience the beauty of nature and the grandeur of the city, and learn how to enjoy the fruits of modern civilization while protecting the environment.

Cultural immersion: Experience diverse life

Enter Nanxun Town. Walk along its laid - back alleys and soak in the millennia - old humanistic heritage. Under the upturned eaves and black tiles, touch time's traces, hear ancient tales, sense the cultural marks left by past scholars, and savor the town's unique humanistic charm.

Multicultural integration

Fruitful study tours

· Visit and study at famous universities

Step into the Yuquan Campus of Zhejiang University and immerse yourself in the profound academic heritage.

· Interesting experiences at the Huzhou Institute

Children experience the charm of cutting-edge science and technology at the Huzhou Institute of Zhejiang University.

· International exchange

Children from different countries and regions exchange ideas and improve themselves around science and technology.

· Scenic culture

Scenic study tours allow you to learn while traveling in nature and culture.

Time: August 15 - 19, 2025

DAY1

Arrive in Hangzhou

DAY2

Zhejiang University in-depth study tour + international exchange activities + pre-contest adaptability training

DAY3

GAR 2025 China International Open

DAY4

Huzhou Institute of Zhejiang University, either Nanxun or Taihu Ancient Town (the specific arrangement may be adjusted according to the situation)

DAY5

Return journey

Five days and
four nights
itinerary

The cost includes : three days of lunch from August 16 to 18, four days of dinner from August 15 to 18 ; hotel accommodation (including breakfast) ; city transportation (including airport or high-speed railway station pick-up) ; attraction ticket (if any) ; activity fee ; guide fee ; insurance fee, etc.

Note: No air ticket or high-speed train ticket is included ; the hotel is adjacent to Zhejiang University Yuquan campus, close to West Lake scenic spot, you can walk to it, arrange by yourself.

Highlights Review

**GAR 2025 Asian Open and
International Study Tour**
Singapore, January 17-21, 2025

Robot teacher said:

The competition-learning journey helps students grow

"During my study tour in Singapore, the programming robot competition impressed me deeply. Students programmed robots with diverse functions, promoting teamwork and innovation. Visiting Google's Singapore headquarters, we were inspired by the tech atmosphere. Learning while having fun, I realized the charm of making learning enjoyable and the value of programming education. I hope for more such activities to spark students' passion for programming and let them explore the tech world."

Parent said:

Learn while playing tap the potential of children

"Studying in Singapore deeply impressed me. The children felt the academic vibe at the National University of Singapore and were drawn to its advanced tech and innovation labs. During the robotics competition, they used code to make robots do amazing things, showing great creativity. This study tour widened their horizons and let them apply what they learned. I now truly understand the value of programming education. In the future, I'll fully support my child's tech dreams and hope for more competitions to keep their passion burning."

Contestant said:

In the programming arena I gained growth

"In this competition, I learned a lot of new knowledge, and it was very interesting. I programmed commands for the robot to complete various tasks, such as grabbing objects, transporting supplies, and navigating around obstacles. I also made many new friends from Malaysia, Singapore, and the Philippines. We played games together, discussed robots, and improved my spoken English skills."
